

Based on the background reading concerns (www.brettfleisch.com), [the cover letter to WMWD on the web site](#), and the Model Water Efficient Landscape Ordinance, the proposal is on the table to consider the Model ordinance using a budget based tier structure to be amended to only consider those residence that fit within 493.1. meaning "This section, 493.1" which was adopted for all WMWD customers, shall "apply to all existing landscape that were installed before January 1, 2010 and are over one acre in size". This implies customers with less than 1 acre will be rolled back to the 2010 rate structure, amended with updated rates, as the ordinance originally required no adoption of the budget-based rate structure for properties less than one acre. It was WMWD that imposed the change for all customers whereas the ordinance required it for only customers over one acre in size.
