<Appropriate Addressee>

Dear Sir/Madam:

Enclosed is a copy of my c.v. I would like to be considered for challenges in the area that <your company> is pursuing. My time at UC, Riverside ended in 2011 and my time off has provided an opportunity to recharge in a breather from academia and industry. But I am now interested in new ideas and challenges. My c.v. can be found at www.brettfleisch.com/fleisch_vitae.pdf. My web site is www.brettfleisch.com

This open ended application is for a technical and/or managerial position and may be matched by my education background in the c.v. An interesting renewal in academia may also be of interest. Government experience and academic qualifications from holding a tenured position in academia for 19 years may be of interest to <your company>. Actually there were 22 total years in academia starting in 1989.

In terms of research, most of my practical research has involved modifying internals of operating system and developing new prototypes. Supervision of students can be found in the c.v.

If I can be of further assistance please let me know.

Sincerely,

Brett D. Fleisch, Ph. D.
